

Raytown Quality Schools
Flu Clinic
 2018-2019 School Year

The 2017-2018 flu season was the worst in a decade across the nation, resulting in school closures, high rates of hospitalization, and pediatric death. To protect its students against the flu this season, the Raytown School District has collaborated with CareDox's Healthy Schools program to offer flu shots to your child during the school day with the goal of ensuring that flu shots are available to 100% of our district's students.

The CDC recommends a flu shot as your child's #1 defense against the flu. Healthy Schools' flu shot clinics are run by nurses trained to care for kids. The copay is \$0, so there is absolutely no cost to you.

Online registration is now closed and over 2,800 students have been signed up. If you are still interested in registering your student, paper registration forms (<https://mo02210312.schoolwires.net/site/default.aspx?PageID=1426>) will be accepted up until the day of your school's clinic. #RaytownFightstheFlu #flushotsmakeHealthySchools
